

100% NATURAL METHIONINE RECYCLER FOR ANIMAL FEEDING

- 100% natural
- Methionine recycler
- Cost-effective
- Better performance

OptiMethione®

OptiMethione®

Is intended for partial substitution of synthetic methionine. It allows the reduction of feeding costs, while offering superior productive performance. It is an effective agent against heat stress and has no restrictions for organic farming.

100% natural

Better performance

Methionine recycler

Cost-effective

OptiMethione® contains an array of active compounds, such as L-methionine and S-adenosylmethionine (SAM), which result in a complex mode of action and amplified effects – improved performance, enhanced immunity and antioxidant status. It optimizes the use of methionine through improved methylation of homocysteine that allows the recycling of methionine.

IMPROVED PERFORMANCE, IMPROVED IMMUNITY AND ANTIOXIDANT STATUS

It is composed of plants, such as *Trigonella foenum-graecum* and *Allium sativum*, dried and grinded (no extraction process), with natural stability.
