

**LivoLiv 250®**

## Hepatic modulator to improve metabolism and productive performance of animals

Modulation of liver  
metabolism

Optimizes hepatic  
detoxification  
capacity

Contributes to liver  
health and animal  
productivity

## **LivoLiv 250<sup>®</sup>**

**LivoLiv 250<sup>®</sup>** is a 100% natural liver modulator

## **Benefits**

The liver is the organ that performs the largest number of vital functions in the animal organism, three of which are particularly relevant:

- Elimination of toxins from the organism (detoxification).
- Storage of energy (glycogen) and liposoluble vitamins (A, D, E and K).
- Digestion of nutrients (through the production of bile acids) and metabolization.

The liver of animals in intensive production systems is frequently damaged by a variety of substances, both endogenous (e.g. free radicals)

and exogenous (e.g. mycotoxins, heavy metals, antibiotics and growth factors).

Liver damage can affect growth, egg production, reproduction, pigmentation in meat and eggs etc. **LivoLiv 250<sup>®</sup>** is a 100% natural liver modulator, a polyherbal blend with active ingredients such as Quercetin and Andrographolide, known for their hepatomodulatory properties. **LivoLiv 250<sup>®</sup>** contributes to reduce liver damage, optimizing detoxification capacity and accelerating the regenerative process. In addition, it stimulates the synthesis of hepatic digestive enzymes, which improves the digestion and absorption of carbohydrates, proteins, lipids and vitamins.
