

NuxaSan 500™

Natural additive that contributes
**to maintain the balance of the
intestinal microbiota and
intestinal health**

Flexible for application in many different situations, combinations, and protocols

Composed by natural substances known as actives on coccidia control

Improves animal performance in situations of high coccidia challenge

100% natural and residue-free

No restrictions

NuxaSan 500™

Benefits

The maintenance of a balanced microbiota in the gastrointestinal tract (GIT) is fundamental for intestinal homeostasis, nutrient digestion and host metabolism, affecting the physiology and general well-being of the animal. The balance of the intestinal microbiota involves promoting the development of certain populations of microorganisms, inhibiting the development of undesirable disease-causing species and modulating the response of the gut-associated immune system.

NuxaSan 500™ It is a product 100% rich in phytoactives that participate in maintaining the

balance of the intestinal microbiota: bacteria, protozoa, all contributing to reducing oxidative stress and also chronic intestinal inflammation, which translates into better animal performance.

P.S.T. Complex

Unique phyto-molecular complex that brings together the anticoccidial action of several phytoactives in its formula and determines the synergistic effect of the 4 mechanisms of action on *Eimeria* membranes.
